

EDUCATION CATALOG

N A C A 2 0 0 7

The National Roofing Contractors Association (NRCA) has been at the forefront of roofing education for more than 121 years, delivering unparalleled learning opportunities to roofing professionals worldwide. NRCA's courses provide high-quality, content-rich programming to expand your and your employees' knowledge.

Whether you seek professional-development opportunities, training for your employees or technical roofing programs, NRCA provides a wealth of educational opportunities to its members, roofing and sheet-metal professionals, building owners and facility managers.

NRCA provides exceptional and comprehensive training to fulfill your educational needs through face-to-face conferences; customized educational classes; online learning courses; training consulting services; contractor leadership programs; Certified Roofing Torch Applicator (CERTA) classes; Occupational Safety and Health Administration- (OSHA-) sponsored education; and speaking engagements.

The NRCA Learning Experience—Our Commitment to You

NRCA creates educational experiences that:

- Provide you with in-depth roofing knowledge for improving your company's operations and profitability
- Encourage you to share ideas and best practices to find solutions to business problems
- Make a positive difference in your life by enhancing your business and personal success

When you participate in NRCA educational programs, you have the opportunity to learn from the industry's brightest experts while interacting with your peers. NRCA's instructors are chosen for their roofing, risk-management and technical expertise; tenure in the industry; reputation; and teaching abilities. And through peer-to-peer exchange, you will share your own ideas and learn from others during open, lively discussions.

Accreditation

Accreditation provides a permanent record of educational accomplishments and satisfies the mandatory education requirements for relicensure in many states. NRCA is an authorized provider of continuing-education credits for the following accreditation agencies:

- International Association for Continuing Education and Training (IACET)

0.1 Continuing Education Unit (CEU) is earned per program hour.

- The American Institute of Architects Continuing Education System (AIA/CES)

1.0 Learning Unit (LU) is earned per program hour. Most learning units can be used to satisfy health, safety and welfare (HSW) credit requirements.

- Florida Construction Industry Licensing Board

1 credit hour is earned per program hour. Some program hours can be used to satisfy workplace safety (WPS) requirements. NRCA is Provider No. 0000936

Course Discounts

NRCA offers several ways to save on its 2007 scheduled conferences:

Team discount: Register three people from your organization for the same class and send a fourth person for FREE.

Multiclass discount: Enroll in three one-day classes and your fourth one-day class (of equal or lesser value) is FREE.

City package discount: Spend a week with NRCA in select cities and save on all five classes held that week. (See page 12 for details.)

Note: Discount options cannot be combined for the same class.

Call Mary Ann Evanoff, NRCA's administrative assistant of education and risk management, at (800) 323-9545, Ext. 7533, for more information about NRCA's discount options.

NRCA CONFERENCES

Learn from experienced and respected experts. Share insights and experiences with colleagues. During NRCA's programs, you are encouraged to actively participate in the learning process through small group discussion, lectures, case studies and hands-on exercises. NRCA's conferences ensure you're up to date with the latest issues and trends affecting your company and the roofing industry. The conferences are designed to provide you with the information and tools necessary to broaden your knowledge, increase your effectiveness and maximize your learning experience to be a leader in your company.

For more information regarding NRCA's educational programs and a detailed description of each course, please visit www.nrca.net/rp/education.

All the following NRCA conferences also can be delivered on a customized, contract basis any time during the year. (See page 5 for details.)

For Foremen Only, Level 1*

Take a proactive approach to employee education by sending your field managers to this class, which focuses on communication and management skills. Foremen often have excellent roof system application skills but may not possess strong communication and management abilities that would help them be more effective managers. This course teaches your foreman how to communicate effectively and work well with all types of people. He will learn how to handle tough situations tactfully, especially when disciplinary action is needed. He also will discover how to establish credibility, build a rapport with his crew members and motivate them to improve job-site productivity.

Orlando, Fla.	Jan. 5	Event Code: FFO07—1/5
Allentown, Pa.	May 21	Event Code: FFO07—5/21
Chicago	Nov. 16	Event Code: FFO07—11/16

Accreditation: 0.65 CEU

Tuition: Members: \$395 Nonmembers: \$545
8 a.m. - 4 p.m. One-day class

*For Foremen Only, Level 2 is available as a customized program in 2007 and builds on skills learned in Level 1. (See page 5.)

SpecRight Training Session

You'll be an industry leader and gain a competitive edge when you help your customers save money by lowering their energy costs. This class will teach you how to use NRCA's EnergyWise Roof Calculator software** to illustrate how insulation costs can be recouped through energy savings. Learn about cool roofs and the latest trends in energy codes—including California's Title 24 and the Chicago Energy Code. Breakout sessions will offer you an in-depth look at ASHRAE 90.1 energy codes, green roofing and the EnergyWise software. For more information, visit www.specright.net.

**You will receive a free copy of NRCA's EnergyWise Roof Calculator when you attend this course.

This course will benefit roofing contractors, specifiers, building owners and facility managers.

NRCA — At the Forefront of Roofing Education

Performance Technology for Roof Systems

This four-day interactive course is the most comprehensive roofing technology program in the industry, providing a detailed overview of all low- and steep-slope roof systems available today and examining the benefits and limitations of each. You will review the relevant standards and codes that govern roof system design, materials and installation; gain a better understanding about provisions in roof system warranties; and identify the roofing safety and health standards administered by the Occupational Safety and Health Administration (OSHA).

After attending this program, you will understand the basic components and functions of roof systems and assemblies; describe how roof system selection and application issues affect long-term performance; identify relevant standards and codes for roofing projects; and recognize roofing project safety hazards.

This course will benefit roofing contractors, building owners, facility managers, designers, and manufacturers.

San Jose, Calif.	Oct. 30-Nov. 2	Event Code: PTRS07—10/30

Accreditation: 2.8 CEUs 28 AIA/CES LUs (HSW credit)

This course qualifies for 28 hours of Florida Construction Industry Licensing Board credit (including WPS).

Provider No.: 0000936 Course No.: 0008979

Tuition: Members: \$1,199 Nonmembers: \$1,499
8 a.m. - 5 p.m. Four-day class

Advanced Roofing Technology: The Master's Course

This one-day course is tailored for individuals with basic experience in roof system design and application who have a desire to understand more advanced roofing system design principles. You will receive intensive training regarding the design considerations necessary to comply with building code requirements related to roof system wind uplift, water drainage and tapered roof insulation systems.

This course will benefit roofing contractors, consultants, designers and manufacturers.

Manassas, Va.	April 20	Event Code: ART07—4/20
Chicago	Oct. 5	Event Code: ART07—10/5

Accreditation: 0.75 CEU 7.5 AIA/CES LUs (HSW credit)

Tuition: Members: \$395 Nonmembers: \$545
8 a.m. - 5 p.m. One-day class

Exploring Roof System Options

Purchasing a roof system can be overwhelming. There are many factors to consider, and it is essential to match the characteristics of a roof system with the building's design and use. *Exploring Roof System Options* provides an overview of all available low- and steep-slope roof systems in today's market and identifies the requirements necessary for maintaining the expected life of your roof system.

This course will benefit building owners, facility managers and entry-level roofing contractors.

Tuition: Members: \$395 Nonmembers: \$545
8 a.m. - 5 p.m. One-day class

Maximizing the Life of Your Roof: Implementing a Roof Asset Management Program

Today's building owners and facility managers need to take steps to protect one of their biggest financial assets—their buildings' roof systems. Roof system integrity is the single largest factor in building efficiency. Although ongoing maintenance and continual service and repair will ensure a roof system performs well, a roof asset management program also will provide you with the information necessary to make good economic decisions to determine how best to preserve and prolong the life of your roof system and provide a better return on your roofing investments.

Note: If conditions permit, this program involves an on-site roof inspection that may require ladder access to a facility roof along with inspection activities on the roof. Although this is a useful exercise, this is not a requirement for successful completion of the program. If you are not comfortable on a ladder or a roof, you may choose not to participate in this portion of the program.

This course will benefit roofing contractors, building owners and facility managers.

Manassas, Va.	April 17	Event Code: MAX07—4/17
Chicago	Oct. 3	Event Code: MAX07—10/3

Accreditation: 0.75 CEU 7.5 AIA/CES LUs (HSW credit)

Tuition: Members: \$395 Nonmembers: \$545
8 a.m. - 5 p.m. One-day class

ManageWrite: Roof Management Tools That Work

Record keeping can be the most difficult part of any roof asset management program. Discover the solution—Roofer EMS. Originally developed by the U.S. Army Corps of Engineers, Roofer EMS (Engineered Management System) is an effective, unbiased inspection and roof condition assessment tool that will provide the accurate, measurable data you need for evaluating and tracking roof system maintenance. ManageWrite enables you to collect inventory and inspection information, rate present roof system conditions, and identify and prioritize projects that require repairs or replacements.

This course will benefit roofing contractors, building owners and facility managers.

Chicago Oct. 4 Event Code: MW07—10/4

Accreditation: 0.75 CEU

Tuition: Members: \$395 Nonmembers: \$545
8 a.m. - 5 p.m. One-day class

Roof Inspection, Diagnosis and Repair

Roof systems are valuable assets that must be maintained and protected. A successful roof management program depends on periodic roof inspections and regularly scheduled maintenance repairs. This course will teach you the latest techniques for performing visual roof inspections, roof moisture surveys, and core sample collecting and testing procedures. You will learn how to identify roof system problems and establish and prioritize repair procedures.

Note: If conditions permit, this program involves an on-site roof inspection that may require ladder access to a facility roof along with inspection activities on the roof. Although this is a useful exercise, this is not a requirement for successful completion of the program. If you are not comfortable on a ladder or a roof, you may choose not to participate in this portion of the program.

This course will benefit roofing contractors, building owners and facility managers.

Roofing Education***

Roof Repair and Maintenance

Roof system maintenance often is the most neglected area of any roof management program. It also is the single most important factor (after correct application) for determining the life span and cost of a roof system. *Roof Repair and Maintenance* is the ultimate industry course that teaches contractors, facility managers and building owners the methods for achieving extended life and value from roof systems. This course blends presentations with hands-on exercises to guide participants through techniques for emergency, temporary and permanent repairs.

This course will benefit roofing contractors, building owners and facility managers.

Orlando, Fla. Sept. 26-28 Event Code: RRM07—9/26

Accreditation: 2.25 CEUs 22.5 AIA/CES LUs (HSW credit)

Tuition: Members: \$999 Nonmembers: \$1,299
8 a.m. - 5 p.m. Three-day class

Architectural and Low-slope Metal Roof Systems

Metal roof systems continue to gain popularity for both new and reroofing projects. This comprehensive two-day course will review the important issues to consider when designing and selecting a metal roof system. Learn about the different types of metal, metal finishes and coatings suitable for local climate conditions; the various structural and nonstructural design types and their fastening systems; and the critical factors for successful installation of a metal roof system.

This course will benefit roofing contractors, designers, architects and manufacturers.

Manassas, Va. April 18-19 Event Code: ALMR—4/18

Accreditation: 1.5 CEUs 15 AIA/CES LUs (HSW credit)

Tuition: Members: \$799 Nonmembers: \$999
8 a.m. - 5 p.m. Two-day class

NRCA CUSTOMIZED EDUCATIONAL CLASSES

Roofing Safety: OSHA 10-hour Program

This is the only OSHA 10-hour construction program specifically designed to help roofing workers and supervisors identify and avoid hazards they are likely to encounter every day on the job. The class is highly engaging and includes video segments of job-site scenarios that show typical hazards and their remedies. This information is essential for those who need to know current OSHA requirements for safety and health standards or need to verify these standards are followed. Upon completion, participants receive an OSHA 10-hour safety training completion card.

This course will benefit roofing contractors, safety directors, superintendents, foremen, roof mechanics and laborers.

Orlando, Fla.	Jan. 4	Event Code: 10HR07—1/4
Las Vegas	March 5	Event Code: 10HR07—3/5

NRCA CUSTOMIZED EDUCATIONAL CLASSES

Interested in a class not currently being offered? Dates or locations not convenient? All scheduled NRCA conferences can be customized for your company to meet your training needs.

Benefits of NRCA's customized educational classes include:

- **Customized training:** Programs are developed to meet your specific needs and concerns.
- **Convenience:** Training can take place at your company's office or another suitable location of your choice.
- **Economy:** Costs are substantially reduced when groups of employees participate in the same training.

To inquire about NRCA's customized educational classes for your company, please contact Allison Noble, NRCA's manager of customized education, at (800) 323-9545, Ext. 7509 or anoble@nrca.net.

Roof System Technical Programs

Introduction to Roofing

This seminar is designed for those new to the roofing industry who need to understand the basics. This course reviews the key components and functions of a roof assembly, including the roof deck, insulation, vapor retarder, and membrane or roof covering. You will learn about the different types of low- and steep-slope roof systems and their methods of application, ventilation and flashing requirements. Other topics include the standards and codes that govern roof system design and installation and roof safety.

0.75 CEUs One-day class

Roof System Analysis

NRCA offers one-day comprehensive courses for those who wish to focus on a specific type of roof system. You will examine design and performance factors; material properties and manufacturing processes; attachment methods and application techniques; and maintenance and repair procedures for one of the following roof systems:

- Built-up Roof Systems
- Polymer-modified Bitumen Roof Systems
- Single-ply Roof Systems
- Spray Polyurethane Foam-based Roof Systems

0.75 CEUs One-day class

Contractor Management

For Foremen Only, Level 2

For Foremen Only, Level 2 reviews discussions about communication and management techniques learned in Level 1 (see page 2) with increased attention to disciplinary conversations and intervention. Level 2 further focuses on building relationships with customers and handling customer complaints. This program includes exercises and conversations to develop leadership skills for these key company leaders. Previous participation in *For Foremen Only, Level 1*, is preferred but not required.

Accreditation: 0.65 CEU

8 a.m. - 4 p.m. One-day class

"Super" Management: Skills for Foremen and Superintendents

Time and personnel management are critical for success, so boost your company's productivity by providing this unique opportunity for your superintendents and foremen. Participants will conduct case studies and perform hands-on exercises that help improve time- and project-management skills. This program provides advanced field-management skills for those leading your roofing crews.

Accreditation: 0.75 CEU

8 a.m. - 5 p.m. One-day class

Roofing Sales: Profiles of Productivity

A successful salesperson in the roofing industry needs more than good communications skills. This program provides the keys that are specific to the roofing industry—for salespeople of all experience levels. It will help sales staff increase sales and be more effective in their companies' internal operations and production processes.

Accreditation: 0.75 CEU

8 a.m. - 5 p.m. One-day class

Creating or Improving a Service/Maintenance Center

Service/maintenance centers can generate significant profits for roofing companies yet often remain ignored opportunities. NRCA's half-day program provides you with solid information and powerful tools to create or improve service/maintenance centers. Whether you plan to start a new business division or enhance an existing one, this program will provide a key to your company's success.

Accreditation: 0.4 CEU Half-day class

Current Issues in Risk Management

This continually evolving program provides you with the latest risk-management-related information affecting your roofing company. Topics are updated frequently and include insurance, health, safety, legal and regulatory issues. Call NRCA to find out about upcoming topics or request one that interests you.

Accreditation: 0.75 CEU

8 a.m. - 5 p.m. One-day class

Train-the-trainer Workshop

These workshops are designed to assist prospective instructors with their instruction and presentation skills. This interactive program will develop participants' training skills and offer exercises to strengthen their new skills. The fundamentals of adult learning and key information for teaching roofing-related information will be addressed. Participants will gain valuable insight to help achieve their training goals.

Accreditation: 0.75 CEU

8 a.m. - 5 p.m. One-day class

Certified Roofing Torch Applicator (CERTA) Classes

NRCA/MRCA CERTA Train-the-Trainer Authorization (formerly called CERTA Train the Trainer)

This 10-hour program teaches new industry best practices for torch-applied polymer-modified bitumen roof systems. Successful participants will become NRCA-authorized trainers for the NRCA/MRCA (Midwest Roofing Contractors Association) CERTA program and will be provided with a complete training kit. This program includes classroom and hands-on torching activities using mock-ups and torching equipment. Participants must be proficient in the use of a roofing torch, be able to speak and read English, and have some experience training others.

New in 2007—NRCA/MRCA CERTA Train-the-trainer Reauthorization

Authorized CERTA trainers need to renew their accreditations every three years, and this program provides an opportunity to complete the required reauthorization. In addition, those trainers who also wish to conduct CERTA applicator recertification training are required to successfully complete this reauthorization program. Participants will improve their training and facilitation skills, affirm their skills using a roofing torch and understand the new CERTA applicator recertification program. Participants work through lunch during this program (a boxed lunch is provided). Trainers who fail to become reauthorized within six months of their expiration dates will be required to retake the original 10-hour NRCA/MRCA CERTA Train-the-trainer Authorization course.

Certified Roofing Torch Applicator (CERTA)—Contract class only

This hands-on program teaches industry best practices for safe use of roofing torches. Successful participants become certified and comply with new insurance industry requirements. This program is also available in Spanish.

Upon completion of this program, participants will be able to:

- Identify personal protective equipment requirements for torching activities
- Describe basic first-aid procedures associated with torching activities
- Explain proper steps and procedures for handling propane gas cylinders
- Identify components of a torch assembly
- Demonstrate safe assembly, lighting and use of torch equipment
- Understand the key elements of a comprehensive pre-job inspection
- Recognize hazardous areas and prescribe hazard controls
- Demonstrate safe torching techniques near hazardous areas
- Explain post-job fire watch and other duties

Accreditation: 0.75 CEU

8 a.m. - 5 p.m. One-day class

Occupational Safety and Health Administration- (OSHA-) sponsored Courses

New in 2007—OSHA-sponsored Roofing Industry Fall Protection from A to Z (Free to attend!)*

This free OSHA-sponsored program, offered in both English and Spanish, is for roofing contractors who want help training their employees about fall protection. Increase your awareness of fall-protection hazards and become familiar with the specific equipment to use and work practices to employ to avoid these hazards. You will learn about OSHA's fall-protection requirements and understand the components of fall-protection systems. The course also features demonstrations of equipment for self-rescue and relief of suspension trauma. The fall-protection topics covered in this class include:

Anchors	Chutes	Controlled Access Zones
Debris Areas	Guardrails	Interim Fall-protection Guidelines
Hoist Areas	Holes	Residential Fall Protection
Leading Edges	Lifelines	Personal Fall-arrest Systems
Lower Levels	Warning Lines	Unprotected Sides and Edges
Openings	Rescue	Roof Deck Integrity
Safety Nets	Safety Monitors	Training
Vendors	Inspection, Assessment and Investigation	

Class size is limited; please register early.

8 a.m. - 5 p.m. One-day class

OSHA-sponsored Train-the-trainer Safety Program (Free to attend!)*

The OSHA Train-the-trainer safety program is for roofing contractors who want help training their employees about roof safety. Created for companies that want to jump-start their safety training programs, this program is sponsored by OSHA and is free! Participants agree to conduct the planned safety training with their company's employees in exchange for a daylong workshop and training materials for each employee—all free of charge. Upon completion of the safety training series with your employees, your company will be awarded a \$300 stipend. Enrollment is limited to one program administrator per company. A complimentary lunch will be provided, and a one-night hotel stay also is available at no cost.

Class size is limited; please register early.

Note: This program is available in Spanish in select cities.

A \$150 deposit is required for registration and will only be charged in case of a no-show or late cancellation. Registrants can cancel participation by calling NRCA up to three business days before the program; substitutions may be made. If a registrant does not notify NRCA of the cancellation, your company will be charged the \$150 deposit fee. In addition, if you requested a hotel reservation for the Train-the-trainer Safety Program, you will be responsible for the charges of the unused hotel room.

Future Executives Institute (FEI)

NRCA's Future Executives Institute (FEI) is a comprehensive and powerful learning experience focusing on leading and managing a thriving roofing business. This three-year program offers participants a broader look at management theory and practice, a unique opportunity to develop their leadership and communication skills, and wider views of their companies as they exist in the business world.

The Institute is built on nine core areas essential to small-business operations: management, leadership, human resources, financial management, sales and marketing, roofing industry issues, health and safety, family relationships/succession and personal-development skills.

Courses are held at Northwestern University's prestigious Kellogg School of Management in Chicago and are taught by Northwestern University professors, industry leaders and field experts. Class size is limited to 30 roofing professionals to facilitate in-depth conversations and class relationships throughout the three-year program. In 2007, second-year students will meet Oct. 7-10. The next three-year FEI program will be offered in 2008.

For more information, contact Leslie Kazmierowski, NRCA's manager of insurance programs and Future Executives Institute, at (800) 323-9545, Ext. 7508, or lkazmierowski@nrca.net.

NRCA Online Courses

Not everyone enjoys sitting in a classroom trying to absorb the roofing industry knowledge they need. NRCA now delivers quality online educational programs to you. Whether you are a roofing company employee, roof system designer, facility manager, product manufacturer or student, the roofing industry knowledge you need is available. Take advantage of this opportunity to become better informed about important issues without leaving your busy office and the expense of travelling!

Ask the Expert (ATE) Webinars

Find out about hot industry topics with this series of unbiased live presentations with industry leaders and experts. Learn about current technical issues, the latest safety concerns and relevant business and legal matters affecting the roofing industry. By participating in discussions and asking the presenter your specific questions, you will get the answers you need quickly and accurately. Experience online learning at its best—and keep up to date with the issues that affect your industry!

Please visit

www.nrca.net/rp/education/nrca/courses/online.aspx for a current schedule of NRCA's 2007 Ask the Expert webinars.

These one-hour programs are conducted live bimonthly (January, March, May, July, September and November) starting at 10 a.m. Central time zone and feature the following topics:

Roofing Contractor Management

Discover solid strategies for managing risk, legal challenges, insurance issues and more in this series of business management programs.

January 26: Event Code: ATE07—1 July: Event Code: ATE07—7

Tech Exchange: Straight Talk for Tough Technical Issues

Join our experts as they tackle today's technical challenges with clear insights and no-nonsense solutions.

March 20: Event Code: ATE07—3 September: Event Code: ATE07—9

Roofing Industry Safety

Top safety specialists offer their advice about fall protection, OSHA regulations and other current health and safety topics.

May: Event Code: ATE07—5 November: Event Code: ATE07—11

Accreditation: 0.1 CEU per program hour

Tuition: Members: \$95/per program

Nonmembers: \$135/per program

Ask the Expert one-year subscription discount: Participate in six consecutive ATE programs and save over 25 percent! (Your subscription begins with the next scheduled webinar following your purchase and is not limited to 2007 webinars. If you are unable to attend a live session, a CD of the program will be sent to you free of charge following the webinar.) Event Code: ATE07—YR

Tuition: Members: \$395 per one-year subscription

Nonmembers: \$595 per one-year subscription

Ask the Expert Webinar Archives

Previous Ask the Expert programs are available for purchase on CD. For a list of these programs, go to:

Roofing 101: All the Basics (Coming Soon!)

People new to the roofing industry, facility managers and maintenance mechanics often need fast, comprehensive and affordable information about roof system basics. This high-quality online learning experience is ideal for them. Explore roofing industry topics by participating in these self-paced interactive learning modules. Each module requires approximately one-hour to complete.

- Module 1: Roofing Industry Basics and Terminology
- Module 2: Introduction to Roof Assemblies
- Module 3: The Basics of Current Low-slope Roof Systems
- Module 4: Overview of Steep-slope Roof Systems
- Module 5: Basic Roof Flashing Design and Roof Accessories

Accreditation: 0.1 CEU earned per module completed

Please contact John Schehl, NRCA's director of education and training, at (800) 323-9545, Ext. 7503, or jschehl@nrca.net for more information about this upcoming online program.

NRCA TRAINING CONSULTING SERVICES

Companies in the roofing industry generally have expectations and understandings of the best ways they should operate. However, sometimes, actual performance does not meet expectations. Understanding how to overcome these performance gaps can be challenging and consume valuable time and resources. NRCA's Consulting Services can help.

Training Consulting

Need to update your training program, but don't know where to start? NRCA can help you establish an effective training program that will target your organization's needs. NRCA's professional staff will visit your company to help identify performance problems and implement training strategies that can help meet your organization's mission and vision. Contact Allison Noble, NRCA's manager of customized education, at (800) 323-9545, Ext. 7509, or anoble@nrca.net for more information.

Safety Boot Camp

Does your safety program need some polishing? NRCA's two-day, on-site Safety Boot Camp provides you with the necessary steps to get you started—or choose a comprehensive evaluation of your company's current safety program. You will be guided through a program to produce a written action plan that will help upgrade your company's safety program. A completion certificate is issued when your company completes the course. Contact Harry Dietz, NRCA's director of safety and regulation compliance, at (800) 323-9545, Ext. 7502, or hdi-dietz@nrca.net for more information.

Speaking Engagements

NRCA's professional staff and expert faculty members are available to make presentations about the latest roofing industry issues at your meetings, conventions or dinner events. For more information, contact John Schehl, NRCA's director of training, at (800) 323-9545, Ext. 7503, or jschehl@nrca.net.

NRCA Certificate Programs

Bring your learning efforts into focus by participating in an NRCA certificate program. Intentionally grouped programs create packages of knowledge that enhance your specific skills and professional recognition. NRCA certificate programs provide the most effective industry tools to build focused expertise. Requirements to complete an NRCA certificate program include:

- Submit an application to a specific certificate program
- Enroll in and complete all curriculum course requirements for the program within three years
- Pass a proctored comprehensive final exam for the certificate program

For more information or to apply for a certificate program, contact Allison Noble, NRCA's manager of customized education, at (800) 323-9545, Ext. 7509, or anoble@nrca.net.

Foremen Certificate

Management skills are not always intuitive, and foremen do not always receive the necessary training they need to succeed in their positions. Foremen also need to have good communication skills—skills to enable them to motivate, teach and discipline their crews and communicate effectively with office supervisors and personnel, as well as customers. As a crew leader, a foreman also must be the primary voice for safety. The certificate program requirements will give foremen ample opportunity to learn and practice using new skills in all these areas. Programs completed since 2002 are applicable toward this certificate.

Required curriculum:

- Train-the-trainer Workshop
- Roofing Safety: OSHA 10-hour Program
- Ask the Expert Webinar addressing safety issues
- Two of the following:

For Foremen Only, Level 1

For Foremen Only, Level 2

"Super" Management: Skills for Superintendents and Foremen

Roofing Technologist Certificate

NRCA's roofing technologist certificate indicates the holder has participated in courses sufficient to provide him with a breadth of knowledge and interactive discussions to allow proficiency about roofing, including system types, system design and basic installation.

Required curriculum:

- Introduction to Roofing or Roofing 101: All the Basics; or other evidence of competency*
- Exploring Roof System Options
- Performance Technology for Roof Systems
- Advanced Roofing Technology: The Master's Course
- Two Ask the Expert Webinar programs addressing technical issues

* This requirement can be satisfied by a participant who has a minimum of three years' experience within the roofing industry and passes the Introduction to Roofing written exam.

experience
NRCA!

NRCA CERTIFICATE PROGRAMS

Roof Asset Manager Certificate

Managing roof assets for one or more buildings requires a thorough understanding of roof system life cycles, including initial planning, specifications, application, maintenance, budgets and replacement considerations. The roof asset manager certificate was established to provide those with the responsibilities of managing roof systems the opportunity to develop this expertise.

Required curriculum:

- Introduction to Roofing or Roofing 101: All the Basics; or other evidence of competency*
- Performance Technology for Roof Systems
- Exploring Roof System Options
- Maximizing the Life of Your Roof: Implementing a Roof Asset Management Program
- Roof Inspection, Diagnosis and Repair
- Roof Repair and Maintenance
- Ask the Expert Webinar addressing technical issues

*This requirement can be satisfied by a participant who has a minimum of three years' experience within the roofing industry and passes the Introduction to Roofing written exam.

Safety Specialist Certificate

The safety specialist certificate is designed for a roofing company employee who has safety responsibilities but may not have specialized safety training. This certificate also provides an experienced safety specialist with an overarching refresher and update on current roofing safety regulations. This series of programs provides a wealth of information and resources about the roofing industry.

Required curriculum:

- Roofing Safety: OSHA 10-hour Program
- Train-the-trainer Workshop
- Video-based correspondence courses
 - Fall Protection: It's About TIME
 - Steep-slope Roofing Safety: Don't Let it Slide
 - Scaffold Safety Parts 1, 2 and 3
 - Personal Protective Equipment: What's the Difference?
 - It's A Matter of Choice: Preventing Back Injury and Other CTDs
 - Hazard Communication: Your Right to Know
- Proctored test
- Ask the Expert Webinar addressing safety issues

Safety Specialist Addendum for Hot Work

An applicant must complete the safety specialist certificate program before applying for the hot work certificate addendum.

Required curriculum:

- CERTA Certification
- The following video-based correspondence courses:
 - Fire Safety: Don't Get Burned
 - Your Down and Dirty Guide to Kettle and Tanker Inspection and Maintenance
- Ask the Expert Webinar addressing safety issues

NRLRC's 28th Annual Seminar *Roofing Issues: Decks to Dockets*

Give us three days and you'll walk away with at least 10 new ideas you can implement immediately. Guaranteed.

Innovative ideas don't come from thinking the same old way, so take a few days away from your office to be a part of an exceptional, three-day learning experience.

Join us for the National Roofing Legal Resource Center's (NRLRC's) 28th annual seminar, *Roofing Issues: Decks to Dockets*, Nov. 1-3, at Hilton Tucson El Conquistador Golf & Tennis Resort, Tucson, Ariz. You'll gain a number of ideas and solutions for handling even your toughest business challenges.

This year's captivating seminar will provide you with in-depth information about current legal, contractual, technical, insurance and safety issues affecting your business. In just three days, you will gain extraordinary ideas, innovative strategies and new approaches for improving your company's operations, managing its risks and ensuring continued success.

During the seminar, you'll have the opportunity to learn from some of the industry's brightest experts while interacting with your peers in a hands-on format. Share ideas and best practices, find solutions to problems, and make important business contacts to enhance your business and personal success.

For more information, contact Anne Schroeder, manager of NRLRC, at (847) 299-9092, or aschroeder@nrca.net

Visit www.nrca.net for more information about NRCA's certificate programs and to sign up for correspondence courses.

CITY PACKAGE DISCOUNTS

Join NRCA in the following cities and save on an entire week of conferences!

Jan. 8-12, New Orleans package:

Jan. 8—Exploring Roof System Options
Jan. 9-12—Performance Technology for Roof Systems
Event Code: NOLA07—1/8

Tuition:	Members:	\$1,584	\$1,275
	Nonmembers:	\$2,044	\$1,635

April 16-20, Manassas, Va., package:

April 16—Exploring Roof System Options
April 17—Maximizing the Life of Your Roof: Implementing a Roof Asset Management Program
April 18-19—Architectural and Low-slope Metal Roof Systems
April 20—Advanced Roofing Technology: The Master's Course
Event Code: MAVA07—4/16

Tuition:	Members:	\$1,984	\$1,585
	Nonmembers:	\$2,634	\$2,105

April 23-27, Newark, N.J., package:

April 23-26—Performance Technology for Roof Systems
April 27—Roof Inspection, Diagnosis and Repair
Event Code: NENJ07—4/23

Tuition:	Members:	\$1,584	\$1,275
	Nonmembers:	\$2,044	\$1,635

July 23-27, Seattle package:

July 23—Exploring Roof System Options
July 24-27—Performance Technology for Roof Systems
Event Code: SEWA07—7/23

Tuition:	Members:	\$1,584	\$1,275
	Nonmembers:	\$2,044	\$1,635

Oct. 29-Nov. 2, San Jose, Calif., package:

Oct. 29—Exploring Roof System Options
Oct. 30-Nov. 2—Performance Technology for Roof Systems
Event Code: SJCA07—10/29

Tuition:	Members:	\$1,584	\$1,275
	Nonmembers:	\$2,044	\$1,635

Call NRCA's Education Department for more information:

Registration and CERTA classes: Janice Davis, NRCA's manager of education and risk management, at Ext. 7505 or jdavis@nrca.net.

OSHA-sponsored classes: Michele Biesiada, NRCA's assistant manager of education and training, at Ext. 7534 or mbiesiada@nrca.net.

Course content: Jeanne Schehl, NRCA's director of education program development, at Ext. 7566 or jeaschehl@nrca.net.

Customized classes: Allison Noble, NRCA's manager of customized education, at Ext. 7509 or anoble@nrca.net.

Questions? Please contact Michele Biesiada, NRCA's assistant manager of education and training, at (800) 323-9545, Ext. 7534 or mbiesiada@nrca.net, or Janice Davis, NRCA's manager of education and risk management, at (800) 323-9545, Ext. 7505 or jdavis@nrca.net.

To register: Mail: NRCA, Education Department, 10255 W. Higgins Road, Suite 600, Rosemont, IL 60018
Fax: (847) 299-1183 Online: www.nrca.net/rp/education

Registration Cancellation Policy: NRCA understands circumstances may arise that require you to cancel your registration. If you cancel up to 10 business days before an event, your registration fee will be refunded. If your cancellation is received 10 business days or less before an event, you may send another person in your place or receive a credit voucher that can be applied toward any NRCA educational program during the next 12 months. Registrants who do not cancel before the seminar or do not attend are liable for the entire registration fee. All cancellations must be in writing. NRCA reserves the right to cancel any programs. If such a cancellation is necessary, registrants will be notified and an attempt will be made to reschedule or make alternative arrangements. Registrants will receive a full tuition refund for the program. NRCA is not responsible for other costs incurred. The registration fee is due and payable before the start of a seminar.
